

Summer 2024 Math Assignments for Students Entering Grades 3-Algebra

Students are to log into IXL.com to complete their assigned Summer Math practice. Please complete each skill for your grade level to minimum mastery. You can find each skill by locating its title or by searching the 3 symbol code. Minimum mastery is indicated by a “SmartScore” of 70 and will display an orange ribbon upon completion of each skill.

Each student can log into IXL using the assigned username and password in the following format:

Username: firstlast339

Password: 0000****, where **** is replaced by the student’s four digit lunch code (student ID number).

Example, Joe Smith, with student ID number 9876 would log in using Username: josephsmith339 and Password: 00009876.

All student usernames have a suffix of 339. All passwords begin with 4 zeroes, followed by lunch code.

Upon return to school, Summer Work for students entering Grade 3 will be accounted for with a comment on the report card; students entering Grades 4 through 8 will receive a homework grade in the first marking period.

Students wishing to work beyond minimal mastery or on additional skills are welcome to do so. Have a great summer! And please feel free to share any of your math adventures when you return to school.
